

# See **NEXT-GEN** Visualization in Action

## Live Demo of PlantPax® 5.2 in FactoryTalk® Optix

Join **Cybertrol** and distributor partner **Werner** at Automation Fair to experience a live process skid demo featuring one of the industry's first publicly showcased integrations of PlantPax 5.2 in FactoryTalk Optix!

This hands-on demo is built to highlight how modern visualization, device faceplates, and advanced controller integration come together for smarter, faster decision-making at the edge.

### What You'll See:

- FactoryTalk Optix HMI running real-time operations
- PlantPax 5.2 process objects in action
- Dynamic process monitoring with advanced faceplates
- Parallel FactoryTalk View SE deployment for comparison

### Why It Matters:

- A unique opportunity to explore Rockwell's latest software in a live, fully operational system
- Learn how flexible visualization improves operator experience and speeds commissioning
- Understand how Cybertrol's simulation-first integration approach enables quick deployment with minimal risk

Visit Cybertrol at **Booth 2036** during Automation Fair for a first look at PlantPax 5.2 in FactoryTalk Optix.
